PRICE LIST

Fruit and Ornamental Trees, Small Fruit Plants, Shrubs, Roses Perennials and Green-House Plants

1919
H. J. Weber & Sons
Nursery Co.

Nursery (St. Louis Co.), Mo.

TO OUR FRIENDS AND PATRONS:

We wish you one and all a Happy and Prosperous Year in 1919.

As this Price List goes to print the Representatives of the World Powers are discussing Peace terms. Let us hope that wisdom and sane ideas will predominate and that out of it will come a just settlement of disputes, so that the nations of the world will again live at Peace with one another.

On account of the high cost of paper and at the request of the Government we are this year only issuing a Price List. We expect, however, to again publish a Descriptive Catalogue for fall 1919 and spring 1920 some time during the coming summer, copies of which will be sent to all customers. In the meantime, we will kindly ask you to make up your orders from the price list.

We still have a limited number of our 1918 Descriptive Catalogues on hand and will be glad to mail copy, upon request, as long as they last.

If you are uncertain regarding varieties, or you are looking for other information, write us. We are always glad to answer your questions.

Let us have your orders early. There is going to be a shortage in many lines of Nursery stock; if you wait until the last minute you may be disappointed.

Yours very truly,

H. J. WEBER & SONS NURSERY CO.

Evergreens-Coniferae

Our trees have all been transplanted two or three times, are handsome, selected trees, well branched and rooted, suitable for lawns, etc.

Evergreens can be most successfully transplanted a short time before they are ready to start into growth in the spring. They can also be planted safely very early in the fall. The soil to receive them should be mellow and fine, and great care taken that it is well packed about the roots after they have been well spread out in a natural position.

Wherever possible we dig with ball of earth and wrap same in damp burlap; otherwise we pack roots in wet moss immediately after digging.

CAUTION.—Do not let the sun or wind strike the roots of Evergreens even for a few minutes; you will kill them if you do. Plant immediately on receipt; give thorough drenching of water, but do not apply over the foliage.

Specimen trees and sizes not quoted herein will be priced on application.

All Evergreens are balled and burlapped unless otherwise specified.

Roses

HYBRID PERPETUAL ROSES— Rosa Hybrida Cifera

This class of roses is admirably suited for garden culture, for the formation of rose beds, hedges and permanent plantations, where hardy varieties of roses are desired. They are of easy culture and luxuriant in a deep rich soil. They are benefited by mulching in the fall of the year. Prune according to the habit of growth, cutting back close all weak shoots and shortening the long canes to a convenient length.

The plants offered by us are strong field-grown, delivered in dormant condition. Fall or early spring delivery.

HYBRID TEA, TEA, CHINA AND BOURBON ROSES.

This class of roses is suitable for general cultivation, as they are usually our very best roses, blooming continuously throughout the season. Require more care in winter protection than do the Hybrid Perpetuals in this climate and further north, but will repay the extra care in a goodly supply of fine flowers when roses of the hardy variety are scarce.
